

Learn how to create a cosy home for your spiky friends.

## **DIY HEDGEHOG HOUSE BUILDING GUIDE**

**Craft a welcoming home for hedgehogs.**

## WHAT YOU WILL NEED:

Tape measure  
Pencil

Saw

Electric  
Screwdriver

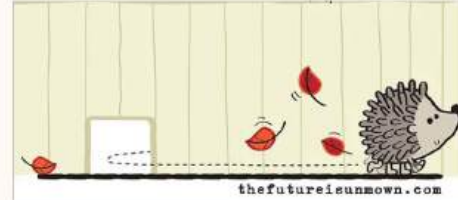

Screws

15mm  
plywood

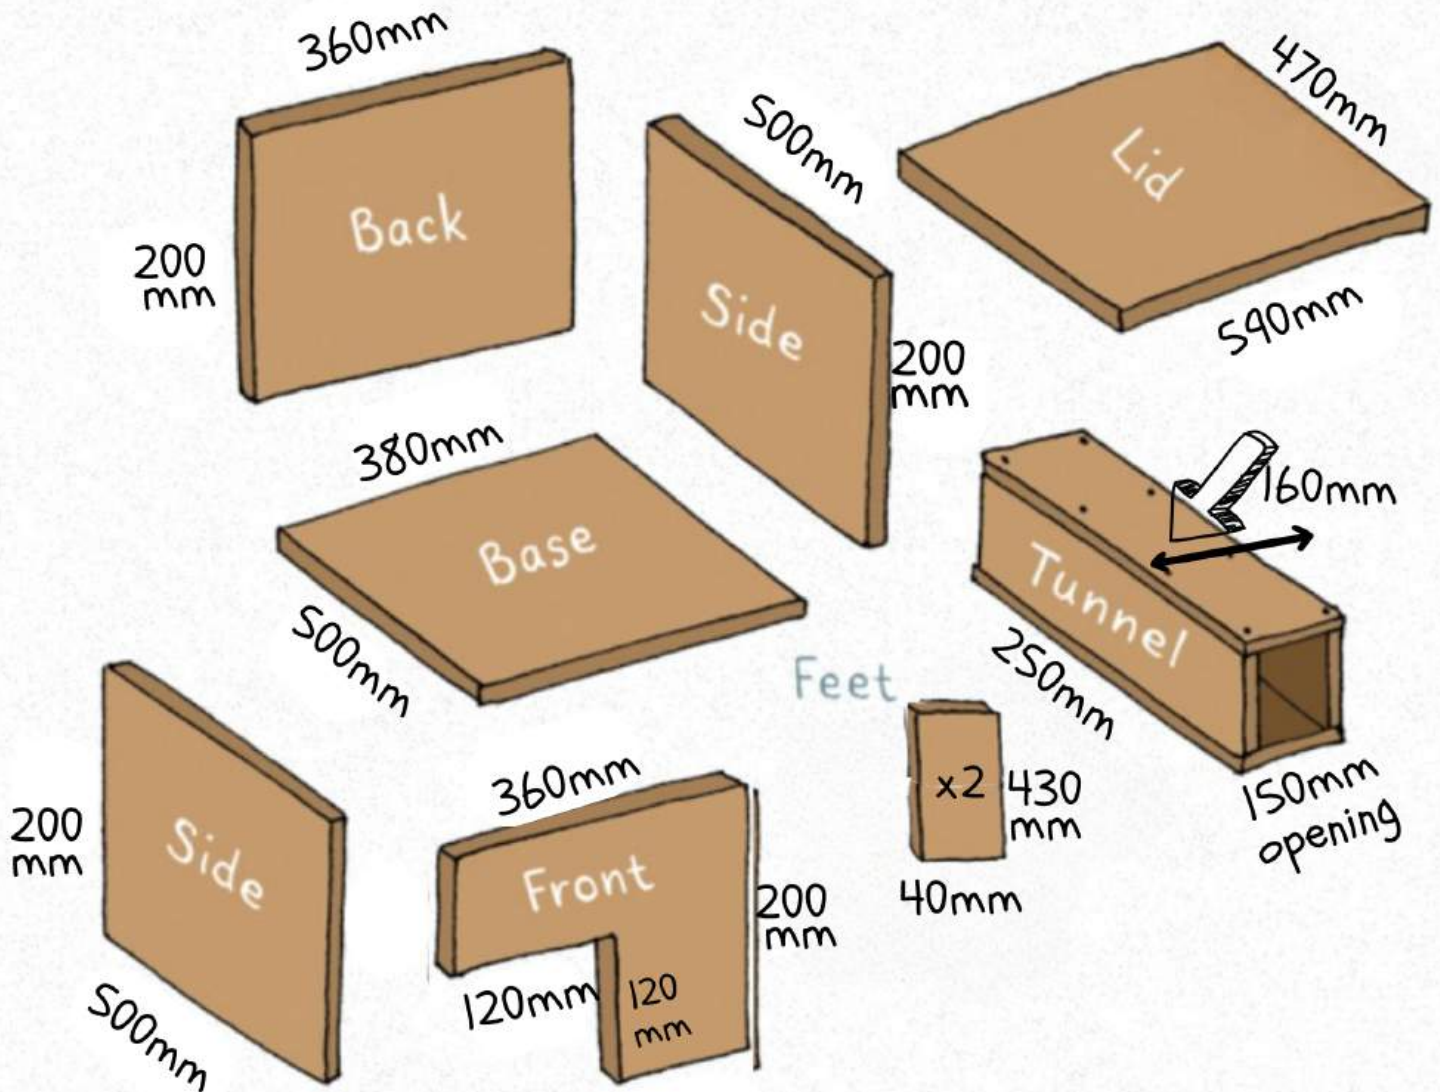

Straw

thefutureisunmown.com

Access to your garden!

## INSTRUCTIONS:

Once you have the plywood cut to size, using the screwdriver, assemble the pieces. Build the main house and tunnel separately. It might be easier for you to attach the feet to the base panel before starting the rest. The tunnel is an important feature because it prevents larger animals getting in to disturb the comfy hedgehog! Pick a quiet, shady spot for your hedgehog house and put the straw inside.
